

RBM CHEMICALS

The combination of the many years of experience of those who manufacture equipment and components and those who manage and maintain them provides the solution for the care and **reduction of the risk of deterioration in air conditioning systems** caused by limestone deposits, sludge, and bacterial filaments.

The maintenance and management experience gained from heating systems and generators has enabled the **continuous improvement** and adjustment of the **formulations of the chemical products** selected here, also addressing the risks of improper dosing or prolonged residence within the circuits.

Protective 100
Series 3917

Protection for heating
and cooling systems

Weight: 1 Kg

Wash Clean 400
Series 3918.A

Cleaner for heating
and cooling systems

Weight: 1 Kg

Wash Clean 400H
Series 3918.B
Fast universal cleaner

Weight: 1 Kg

Spray protect 1
Series 4027

Protection for heating
and cooling systems

Weight: 400 ml

Spray clean 4
Series 4028

Cleaner for heating
and cooling systems

Weight: 400 ml
